## DETAILED ACTION

This communication is responsive to Amendment dated 10/3/2005.

### Election/Restrictions

Claims 17-40 contain embodiments directed to following patentably distinct species of the claims invention:

- A. One embodiment drawn to a method for hardening the sealant to combine the first substrate and second substrate comprising: disposing a reflector located opposite the second substrate with respect to the first substrate; and directing light from the second substrate to the sealant to be hardened, [fig. 14A, claims 17-33 & 37-40].
- B. Another embodiment drawn to a method for hardening the sealant to combine the first substrate and second substrate comprising: directing light from the first and the second substrates to the sealant to be hardened, [fig. 14B, claims 17-31, 34 & 37-40].
- C. Another embodiment drawn to a method for hardening the sealant to combine the first substrate and second substrate comprising: directing light from the first substrate to the sealant to be hardened, [fig. 14C, claims 17-31 & 35-40].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that claims 17-31 & 37-40 are generic.

Applicant is advised that the reply to this requirement must include an

identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent from or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
